

Vaibhav Shrivastava

Satna, (MP) India | Email | +91 9131198665 | Portfolio | LinkedIn | GitHub

Education

- LNCT College, Bhopal**, B.Tech in Computer Science Aug 2022 – Jun 2026
- GPA: 7.75/10
- Christukula Mission Higher Secondary School, Satna**, ISC- 12th Mar 2020 – May 2021
- Percentage: 85.80%
- Christukula Mission Higher Secondary School, Satna**, ICSE - 10th Mar 2018 – May 2019
- Percentage: 85.67%

Experience

- Unity Developer**, GameEon Studios, Remote, India Feb 2026 – Present
- **Patient-Specific 3D Anatomical Visualization Tool**: Built a data-driven 3D uterine anatomy viewer in Unity that instantiates and positions medical abnormalities (fibroids, adenomyomas, polyps) in real-world anatomical coordinates using CellSize-based coordinate conversion. Implemented MeshCollider-based collision with vertex-normal inflation for accurate deformation clearance.
 - Developed a runtime mesh deformation system for a medical visualization application that dynamically deforms uterus and endometrium meshes based on patient-specific anatomical data loaded from JSON.
 - Designed and implemented an automatic collider sizing system that fits MeshColliders to procedurally scaled GameObjects using real-world patient measurements, replacing a legacy cloth-simulation-based approach with a more performant and maintainable pure mesh deformation pipeline.

Technical Skills

Languages: C, C++, Java, C#

Technologies: .NET, Unity, Unreal Engine

Others: Problem Solving, Competitive Programming.

Projects

2D RGP platformer - Lost Kingdom

- Developed a 2D platformer inspired by Unfair Mario, featuring unexpected traps, challenging level design, and unpredictable mechanics.
- Implemented core gameplay systems including AI-driven enemies, health/stamina mechanics, and customizable player abilities.
- Optimized performance across scenes and devices, ensuring stable frame rates and efficient memory usage.
- Tools Used: C#, Unity

An 2D Arcade - Save Us

- A simple 2D arcade genre where player save the tiny creatures. A simple fun to play game.
- Created pixel art assets and animations, integrating them with Unity's animation system for smooth gameplay visuals.
- Tools Used: C#, Unity

Certifications

- Programming in Java - NPTEL (Silver+Elite medalist)
- Core Java - Infosys
- C# for Game Developers - GameEON Studios
